- Manage the risk and quality of long lead equipment (tested at point of origin such as German).
- Manage the close out stage and follow up all M&P close out contracts procedures and hand over to the client.
- Manage weekly progress meeting and work shop meetings for all phases of projects.
- Lead MEP technical & commissioning meeting during different construction stages for projects
- Manage, review and evaluate the contractors' bidding & technical proposal during the tender stage.
- Resolve technical issues that could delay projects as per regulation and standard.
- Manage and review the consultant approval process of Mechanical, plumbing & firefighting systems
- Manage all Maintenance and repair staff to cover the guarantee period for one year
- Monitors agreed service levels using performance management techniques to ensure efficient service provision
- Develop, implement, and maintain preventive maintenance and energy conservation programs for guest rooms, public areas, back-of-house, building systems, etc. accordingly to ensure compliance with corporate policies, international standards, local regulations, and other environmental considerations

Sept 1992--- Sept 1999

Chief Engineer in Khalid Zulfaqr Group of Companies Cairo • Egypt

Technical owner rep. by the following 3 projects: -

-  Dream Boat Cruises (2 floating hotels) with total cost of 24 million EGP (Nile secret & El-Mahrousa)
-  Delta floating restaurants and hotels (one floating restaurant) with total cost of 8 million EGP (Aquarius)

1-Site & Establishments Stage

Under consultant (DAR – Al-HANDASA SHAER & PARTENRS)

- Manage design stage review, approve shop drawing for Mechanical, Plumbing & under deck utilities of infrastructure, boiler's, sewage treatment plant, pump station, fuel supply system, swimming pools and water fountain.
- Manage the approval of mechanical submittals in accordance with the contract technical specifications and German Lloyd approval.
- Manage Problems in management in coordination with Dar Al-Handasa Design Office & follow up endorsement approval procedures.
- Issue site instructions and non-conformance reports, follow up the Contractor's corrective actions.
- Manage quality as per standards and hotel operator policies (Such AS Movenpick, Accor and Marriot)
- Proposes changes to improve the performance of work and reduce cost.
- Manage and certifies the MP Field testing, start-up, pre- commissioning and commissioning, reviewing O&M manuals
- Provide technical support and technical analysis for MEP contractor, in order to treat all systems trouble shooting during commissioning, start-up procedures and stages

2- Start up and operation Stage

Nile secret floating hotel operator (MOVIPEACK – JOLIE VILLE LUXOUR) Aquarius floating restaurant operator (ACCOR GROUP – PULLMAN)

- Responsible for directing, controlling, coordinating and participating in all Engineering activities and In-charge of the daily operation of the Engineering department
- In-charge of the maintenance, repair and engineering of the hotel operation & Security aspects.
- Analyze the hotel performance in the RMS as a basis for strategy decisions.
- Develops and implements cost reduction, work simplification methods and techniques and improvement programs.
- Participates in the execution of new projects including planning and costing.
- Participates in the Engineering budget and business plan preparation.
- Ensures the implementation of all instructions given by the Management.
- Provide support and guidance to subordinates, Plan and organize training such as civil defense, first aid, fire drill trainings.

- Implements preventive maintenance and repair schedules for all hotel complex, machinery, equipment and other facilities.
- Oversees the General Maintenance of the building. Oversees the maintenance and repair of mechanical, electrical and others.
- Coordinates with the hotel management and department for both for a yearly Fire Evacuation Drill and General building maintenance such as masonry, painting, carpentry, etc.
- Manage and train engineering staff to responds quickly to guest request / complaints ensuring courteous, professional service.
- Ensures that health, hygiene and safety regulations are complied with and applied in the hotel in compliance with HACCP standards.
- Responsible to solve any Trouble shooting, operation, repair and maintenance of all Mechanical services such as A/C unit, exhaust and ventilation, Heater and coolers system, water supply and waste water treatment, pool water filtration, Sanitary and plumbing and steam generators, conducts routine inspections of Electrical services such as power supply, main circuit breakers, transformers, high and low tension, emergency generators, room switches, telephones, lifts and lighting.
- Manage and control the routine inspections of utilities supply such as hot and cold water, electricity, gas, fuel. Life safety equipment such as firefighting, sprinklers, detectors, fire pumps, exit signage and extinguishers are properly.
- Conducts routine inspections of Kitchen and laundry equipment.
- Coordinates with Security Contractors in all aspect of the safety and security of the hotel properties and supervises the implementation of all maintenance contracts.

July 1990 ---- Aug 1992

Site Project Engineer Environmental Engineering Technology Co.

• Cairo • Egypt

- Improve the efficiency of the system by proposing the necessary modifications required for the shop drawings.
- Coordinates with electrical/civil team to prevent any conflict among the systems.
- Manage the erection of the central refrigeration and walk in coolers, freezers for dining facilities.
- Advise subcontractors for TAB (HAVC testing and balancing) following the slandered specifications requirements.
- Supervise waste water and plumping systems.
- Supervise and coordinate the installation of HP compressed air plant.
- Review the HVAC duct work shop drawing, submittal by the sheet metal workshop (subcontractor), according to standard specifications and approve or modify the submitted drawing for fabrication.
- Manage and works on preparing the weekly construction meetings with the consulting office on site to resolve all furnished equipment problems, which includes the HVAC equipment, air handling units, condensing units, water chillers, electrical duct heaters variable air volume boxes, exhaust fan, supply fans and humidifiers.
- Finds out a local replacement parts of delayed components.
- Prepares Material Bill of Quantities and obtains Consultant's approval.
- Quantity surveyed of Mechanical, Electrical & Plumbing System.
- Reviewing and Certifying MEP work Invoices.
- Assisting the subcontractors for TAB (HAVC testing and balancing) to perform his job according to standard specification and complete the startup and commissioning procedures according to manufacturer's O&M air handling units with the fire alarm system and related exhaust fans.
- Supervising all electric works belongs to the above mechanical contracts (cables, cable trays, control panels).

COURSES

- Environmental and Green policy implementation
- Calibration course training program
- Health, Safety and Environment
- Conflicts with Customers Professional complaint handling
- Projects management professional training course
