

OMAR EMADELDIN ABDELAZIZ SADEK SHATLA

Mechanical Engineering Graduate

ABOUT ME

As a Mechanical Engineering graduate specializing in Automotive Mechanics from Universiti Teknologi Malaysia, Johor, and a certified Graduate Engineer with the Board of Engineers Malaysia (BEM) and a member of the Syndicate of Engineers in Egypt with a SOLIDWORKS CSWA certificate, I am eager to contribute to an innovative organization where I can apply my skills to the fullest. I am seeking a position in a reputable company where I can enhance my engineering expertise while driving the organization's success.

Date of Birth: 25/07/2000

WORK EXPERIENCE

2022/2023 - Sem 3

INDUSTRIAL TRAINING / INTERN

I worked as an Intern at the Automotive Development Centre in UTM for my industrial training. I was tasked with developing a data acquisition system for measuring the efficiency of a converted electric car (Proton Saga 1.5L). The system would be used during on-the-road testing.

COURSEWORK PROJECTS

2023/2024 - Sem 1

CAD & FINITE ELEMENTAL ANALYSIS

DESIGN, FEA AND FABRICATION OF GO-KART

As the team project leader, I designed the frame parts of an electric Go-Kart that we built. I used SOLIDWORKS to design each part in accordance to the materials available (Aluminum C-channel and rivets), Then imported the assembly to Ansys for running the static simulation. This would ensure that the Go-Kart frame is able to support the weight of the Driver and other components.

2023/2024 - Sem 2

FINAL YEAR PROJECT

DEVELOPMENT AND TESTING OF DAQ

My final year project's title is "IMPLEMENTATION OF DATA ACQUISITION SYSTEM IN MEASURING THE EFFICIENCY OF ELECTRIC VEHICLE". I developed an Arduino-based Data Acquisition system that was tailored to be tested on an RC car. The system dynamically measures the electric performance and efficiency of the RC.

PERSONAL PROJECTS

• DESIGN OF A 9.5L V6 ENGINE

Designed a 9.5L V6 gasoline engine in SOLIDWORKS, modeling all core parts while excluding lubrication, cooling, and fasteners.

• DETAILED TRICONE DRILL MODEL

Modeled a Tricone Drill in SOLIDWORKS, including key components like bearings and ball-retaining pins.
